

# Commercial/Healthcare Exchange PA Criteria

Effective: August 1, 2016

**Prior Authorization:** Doxepin Topical Creams

Products Affected: Prudoxin (doxepin hydrochloride) cream, Zonalon (doxepin hydrochloride) cream

<u>Medication Description</u>: Although doxepin HCl does have H1 and H2 histamine receptor blocking actions, the exact mechanism by which doxepin exerts its antipruritic effect is unknown. PRUDOXIN® Cream can produce drowsiness which may reduce awareness, including awareness of pruritic symptoms. In 19 pruritic eczema patients treated with PRUDOXIN® Cream, plasma doxepin concentrations ranged from nondetectable to 47 ng/mL from percutaneous absorption. Plasma levels from topical application of PRUDOXIN® Cream can result in CNS and other systemic side effects.

<u>Covered Uses</u>: Short-term (up to 8 days) management of moderate pruritus in adult patients with atopic dermatitis or lichen simplex chronicus.

#### Exclusion Criteria:

- 1. Patients with untreated narrow angle glaucoma
- 2. Patient with a tendency to urinary retention

### Required Medical Information:

- 1. Diagnosis
- 2. Previous medications tried/failed

Age Restrictions: 18 years of age and older

Prescriber Restrictions: N/A

Coverage Duration: 10 days

#### **Other Criteria:**

- A. Patient has a diagnosis of moderate pruritis associated with atopic dermatitis OR lichen simplex chronicus; AND
- B. Patient has tried and failed previous treatment with at least TWO (2) topical steroid creams.
